Unlock

or [import using Secret Recovery Phrase](#)

Need help? [Contact MetaMask Support](#)

2. Click the three dots in the top right and „Expand view” for easier use.

3. Make sure you have added BSC network to MetaMask. Check the manual [here](#).

Visit <https://ggtk.com> and click the "Add token to Metamask" button.

A screenshot of the GGTKN website. The header includes the GGTKN logo, navigation links for "Home", "Buy/Trade", "Cooperations", "Benefits", and "Where to spend GGTKN", a blue button labeled "Add token to MetaMask", and a language dropdown set to "English". The main content area features the heading "GG Token" and text stating it was created in cooperation with "GG International, White Lotto, and GG.World". Below this, there are links for trading on CEX at "coinstore.com", DEX trading at "PanCakeSwap (Pair BNB/GGTKN)", and buying with a card at "Flooz.Trade". A box contains release schedule information: "2022 release: 10% of Total Supply only!", "2023: 10%", and "2024-2025 -> TBA in December 2022". At the bottom, there are social media links for "One Pager", "Whitepaper", "Telegram", "TWITTER", and "FACEBOOK". A MetaMask notification window is overlaid on the right side, titled "Add Suggested Tokens" and asking "Would you like to import these tokens?". It lists "GGTKN" with a balance of "0 GGTKN". The notification has "Cancel" and "Add Token" buttons.

4. Click "Add token" in the notification window. You will see that the token has been added to the asset list.
